

VAB™ DSP Education Kits

Low-cost bundled DSP kits with hardware, software, and accessories - ideal for DSP Labs!

This low cost kit has all the pieces you need to get started; just connect to a standard PC running Windows (95/98/NT/2000) and put the CD-ROM in!
(HSKT0431 Kit shown)

If you're interested in teaching DSP and would like to be able to show real-time examples of DSP theory without having to teach a course in C or Assembly, the VAB DSP Education Kit may be just what you're looking for:

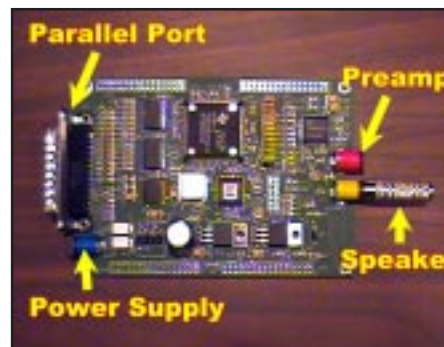

- Run Real-time DSP Examples on actual DSP's
- Choose from a number of different DSP chips
- Increase the 'Excitement Factor' in teaching DSP!

These complete bundled kits include everything you need to turn a standard PC into a real-time DSP station.

These cost-effective complete DSP Education Kits will allow you to upgrade a standard set of PC's into a cutting-edge DSP Lab!

The easy-to-use Visual Application Builder (VAB) DSP software is included with real-time examples. With VAB, programming a DSP is simple

The included DSP hardware is one of the standard DSP boards supplied by Texas Instruments

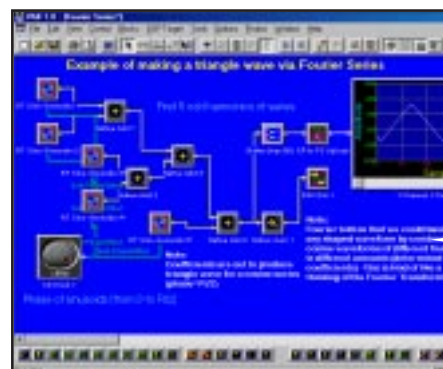

The VAB DSP Education Kit is packed with hardware, software, and accessories - everything you need to ensure turnkey operation

VAB DSP Education Kits	
Part Number	DSP Hardware
HSKT0431	TMS320C31 DSK
HSKT0454	TMS320C5402 DSK
HSKT0462	TMS320C6211 DSK
HSKT0467	TMS320C6711 DSK
HSKT0424	TMS320C243 DSK
